Property of Master3D (PVT) LTD. Visit <https://www.master3d.lk>

time

- **Massive Build Volume** – 420×420×500 mm space to print larger, more ambitious models
- **LeviQ 3.0 Auto-Levelling** – 121-point mesh levelling for perfect first layers every time
- **Multicolour-Ready** – Compatible with ACE Pro for stunning multi-colour prints

## **Anycubic Kobra 3 Max 3D Printer**

Ever dreamt of bringing your large-scale ideas to life without compromising on speed or quality? The **Anycubic Kobra 3 Max 3D Printer** is your ticket to turning those dreams into reality. With an expansive build volume of 420 x 420 x 500 mm, it's like having a personal factory on your desk. Whether you're crafting intricate cosplay armor or functional prototypes, this printer handles it all with finesse.

Speed is no longer a luxury. Boasting a maximum print speed of 600mm/s, the Kobra 3 Max ensures your projects are completed in record time without sacrificing detail. It's like upgrading from a bicycle to a sports car—your printing journey just got a whole lot faster.

## **Precision Meets Innovation**

What sets the Kobra 3 Max apart? It's the blend of cutting-edge features designed for both novices and seasoned makers. The LeviQ 3.0 auto-leveling system ensures a flawless first layer every time, eliminating the guesswork and manual adjustments. Think of it as having a seasoned technician fine-tuning your printer before each job.

But that's not all. With dual Y-axis motors and anti-skip belt tensioning, layer misalignments are a thing of the past. It's like having a GPS for your printer's movements—precise, reliable, and efficient. And for those looking to add a splash of colour, the optional ACE Pro system allows for multicolour printing, turning your creations into vibrant masterpieces.

## **Key Features at a Glance:**

- **Massive Build Volume:** 420 x 420 x 500 mm for large-scale projects.

- **Blazing Fast Speeds:** Up to 600mm/s to bring your ideas to life swiftly.
- **LeviQ 3.0 Auto-Leveling:** Ensures perfect first layers every time.
- **Multicolour Printing Capability:** Optional ACE Pro system for vibrant, multi-hued prints.
- **Dual Y-Axis Motors:** Enhanced stability and precision in every print.

At *Master3D*, we believe in empowering creators with tools that match their ambition. The **Anycubic Kobra 3 Max 3D Printer** isn't just a machine; it's a gateway to endless possibilities. Whether you're a hobbyist or a professional, this printer is designed to elevate your craft.

#### FAQs:

1. **Q1. Can I use filaments from other brands with the Kobra 3 Max?**  
A. Absolutely! The Kobra 3 Max supports 1.75mm filaments, including PLA, PETG, ABS, and TPU from various manufacturers.
2. **Q2. How quickly does the heated bed reach optimal temperature?**  
A. Thanks to its 800W AC hotbed, it heats from 25°C to 60°C in just 125 seconds, ensuring minimal wait times.
3. **Q3. Is the printer compatible with third-party slicing software?**  
A. Yes, while it comes with the Anycubic Slicer Next, it also supports third-party slicers, giving you flexibility in your workflow.

Feature	Specification
