

Anycubic Kobra 3 V2 3D Printer

LKR 142,050.00

Anycubic Authorised Reseller

- **6-Month Warranty Included** for worry-free operation.
- **Ultra-Fast Printing Speed** - Reach up to **600 mm/s** with lightning-fast

acceleration.

- **Multi-Colour Printing** – Print in **4 colours (expandable to 8)** for stunning results.) (Ace Pro Sold Separately)
- **Smart Auto-Leveling (LeviQ 3.0)** – Perfect first layers every time, fully automatic.
- **Built-in 720p Camera** – Keep prints flawless and monitor remotely in real time.

Anycubic Kobra 3 V2 3D Printer

Looking for a 3D printer that marries speed, versatility, and smart features? The **Anycubic Kobra 3 V2** delivers all that—and more. It's built to help you go from concept to creation faster than ever. This is the kind of machine you'll brag about in maker communities. At *Master3D*, we're proud to offer this powerhouse that brings next-level printing into your workshop.

Why You'll Love the Anycubic Kobra 3 V2

The moment you fire up this printer, you'll feel the difference. With **auto-leveling (LeviQ3.0)**, dual-gear direct drive extruders, and built-in **vibration compensation**, it tackles tricky prints with ease. In combo version, the multicolour architecture (using ACE Pro modules) lets you print in **4 colours by default**, or expand to **8 colours** with the extra kit.

And talking about speed—this beast can hit **600 mm/s** with up to **20,000 mm/s² acceleration**, although the recommended zone is around **300 mm/s** for balance of speed and quality.

What Great Features It Brings

Print volume is solid: **255 × 255 × 260 mm**, giving you plenty of headroom for most projects. The machine ships largely preassembled, so you can be printing in under 30 minutes once you hook up the final bits. It even features a **720p camera** for remote monitoring and time-lapses.

- Build Volume: **255 × 255 × 260 mm**
- Top Speed: **600 mm/s**, Acceleration up to **20,000 mm/s²**
- Auto-Leveling: **LeviQ3.0** with vibration compensation

- Filament Drying: built-in adjustable drying module (35-55 °C)
- Camera: **720p camera** for print monitoring and timelapse

This machine also supports **power-loss resume**, **filament runout detection**, **spaghetti detection**, and **object skip / area levelling**, so it's smart enough to protect your print investments.

Once you start printing, you'll see how *Master3D* chose this gem for serious hobbyists and pros alike—it's fast, smart, colorful, and—most importantly—fun to use.

FAQs

1. **Q. Do I need special filament to use multicolor printing on this machine?**

A. The Kobra 3 V2 supports standard 1.75 mm filaments (PLA, PETG, TPU for the base, and with ACE Pro modules you can expand to ABS, ASA, PC, etc.). Just ensure you use filaments that fall within the machine's temperature and diameter tolerances.

2. **Q. How hard is setup and calibration?**

A. It comes mostly preassembled; the final steps take under 30 minutes. On first power up, it runs a fully automatic levelling and vibration compensation routine. So you don't have to be a technician to get it started.

3. **Q. Can I monitor prints remotely?**

A. Yes, thanks to the built-in 720p camera. You can stream, take timelapses, and keep an eye on your prints from afar.

Specification	Details
Model Name	Anycubic Kobra 3 V2
Print Technology	Fused Deposition Modeling (FDM)
Build Volume	255 × 255 × 260 mm
Printing Speed	Up to 600 mm/s (Recommended 300 mm/s)
Acceleration	Up to 20,000 mm/s ²
Nozzle Diameter	0.4 mm (replaceable)
Filament Diameter	1.75 mm
Extruder Type	Dual Gear Direct Drive

Specification	Details
Auto Bed Leveling	LeviQ 3.0 Automatic Leveling System
Motion Compensation	Active Vibration Compensation
Multi-Color Printing	Compatible with ACE Pro
Filament Drying System	Built-in adjustable temperature (35–55 °C)
Supported Filament Types	PLA, PETG, TPU
Max Nozzle Temperature	300 °C
Max Heated Bed Temperature	110 °C
Build Surface	PEI Flexible Magnetic Steel Sheet
Camera	Built-in 720p monitoring & timelapse camera
Touchscreen Display	4.3" Color Touchscreen
Connectivity	Wi-Fi, USB, and SD Card
Supported Software	AnycubicSlicer, Cura, Simplify3D, PrusaSlicer
Supported File Formats	STL, OBJ, AMF, G-code
Power Input	AC 100–240V, 50/60Hz
Resume Printing Function	Yes (Power-loss & Filament Runout Detection)
Smart Detection Features	Spaghetti Detection, Object Skipping, Area-leveling
Machine Size (Approx.)	480 × 445 × 485 mm
Net Weight	9.9 kg
Package Weight	14.5 kg
Preassembly	90% Preassembled - setup in under 30 minutes
Noise Level	<50 dB (Silent operation)
Supported Languages	English, Chinese, and more
Manufacturer	Anycubic Technology Co., Ltd.
