

Anycubic Kobra 3 V2 Combo 3D Printer

LKR 192,051.60

Anycubic Authorised Reseller

- **6-Month Warranty Included** for worry-free operation.
- **Ultra-Fast Printing Speed** – Reach up to **600 mm/s** with lightning-fast

acceleration.

- **Multi-Colour Printing** – Print in **4 colours (expandable to 8)** for stunning results.)
- **Smart Auto-Leveling (LeviQ 3.0)** – Perfect first layers every time, fully automatic.
- **Built-in Filament Dryer & 720p Camera** – Keep prints flawless and monitor remotely in real time.

Anycubic Kobra 3 V2 Combo 3D Printer - Multicolor Speed Machine

Looking for a 3D printer that marries speed, versatility, and smart features? The **Anycubic Kobra 3 V2 Combo** delivers all that—and more. It's built to help you go from concept to creation faster than ever. This is the kind of machine you'll brag about in maker communities. At *Master3D*, we're proud to offer this powerhouse that brings next-level printing into your workshop.

Why You'll Love the Anycubic Kobra 3 V2 Combo

The moment you fire up this printer, you'll feel the difference. With **auto-leveling (LeviQ3.0)**, dual-gear direct drive extruders, and built-in **vibration compensation**, it tackles tricky prints with ease. The multicolour architecture (using ACE Pro modules) lets you print in **4 colours by default**, or expand to **8 colours** with the extra kit.

And talking about speed—this beast can hit **600 mm/s** with up to **20,000 mm/s² acceleration**, although the recommended zone is around **300 mm/s** for balance of speed and quality. You also get **active filament drying (35-55 °C)** built in, so you don't have to worry about your filament quietly absorbing moisture while waiting in standby.

What Great Features It Brings

Print volume is solid: **255 × 255 × 260 mm**, giving you plenty of headroom for most projects. The machine ships largely preassembled, so you can be printing in under 30 minutes once you hook up the final bits. It even features a **720p camera** for remote monitoring and timelapses.

- Build Volume: **255 × 255 × 260 mm**

- Top Speed: **600 mm/s**, Acceleration up to **20,000 mm/s²**
- Auto-Leveling: **LeviQ3.0** with vibration compensation
- Filament Drying: built-in adjustable drying module (35-55 °C)
- Camera: **720p camera** for print monitoring and time-lapse

This machine also supports **power-loss resume**, **filament runout detection**, **spaghetti detection**, and **object skip / area levelling**, so it's smart enough to protect your print investments.

FAQs

1. Q. Do I need special filament to use multicolour printing on this machine?

A. The Kobra 3 V2 supports standard 1.75 mm filaments (PLA, PETG, TPU for the base, and with ACE Pro modules you can expand to ABS, ASA, PC, etc.). Just ensure you use filaments that fall within the machine's temperature and diameter tolerances.

2. Q. How hard is setup and calibration?

A. It comes mostly preassembled; the final steps take under 30 minutes. On first power up, it runs a fully automatic leveling and vibration compensation routine. So you don't have to be a technician to get it started.

3. Q. Can I monitor prints remotely?

A. Yes, thanks to the built-in 720p camera. You can stream, take time-lapses, and keep an eye on your prints from afar.

Specification	Details
Model Name	Anycubic Kobra 3 V2 Combo
Print Technology	Fused Deposition Modeling (FDM)
Build Volume	255 × 255 × 260 mm
Printing Speed	Up to 600 mm/s (Recommended 300 mm/s)
Acceleration	Up to 20,000 mm/s ²
Nozzle Diameter	0.4 mm (replaceable)
Filament Diameter	1.75 mm
Extruder Type	Dual Gear Direct Drive
Auto Bed Leveling	LeviQ 3.0 Automatic Leveling System
Motion Compensation	Active Vibration Compensation

Specification	Details
Multi-Color Printing	4 Colors (Expandable to 8 Colors with ACE Pro Combo)
Filament Drying System	Built-in adjustable temperature (35–55 °C)
Supported Filament Types	PLA, PETG, TPU, ABS, ASA, PC (depending on ACE module)
Max Nozzle Temperature	300 °C
Max Heated Bed Temperature	110 °C
Build Surface	PEI Flexible Magnetic Steel Sheet
Camera	Built-in 720p monitoring & timelapse camera
Touchscreen Display	4.3" Color Touchscreen
Connectivity	Wi-Fi, USB, and SD Card
Supported Software	AnycubicSlicer, Cura, Simplify3D, PrusaSlicer
Supported File Formats	STL, OBJ, AMF, G-code
Power Input	AC 100–240V, 50/60Hz
Resume Printing Function	Yes (Power-loss & Filament Runout Detection)
Smart Detection Features	Spaghetti Detection, Object Skipping, Area-leveling
Machine Size (Approx.)	480 × 445 × 485 mm
Net Weight	9.9 kg
Package Weight	16.5 kg
Preassembly	90% Preassembled – setup in under 30 minutes
Noise Level	<50 dB (Silent operation)
Supported Languages	English, Chinese, and more
Manufacturer	Anycubic Technology Co., Ltd.
