

Anycubic Photon Mono 4 LCD Resin 3D Printer 10K 7"

LKR 114,776.40

Anycubic Authorised Reseller

- **6-Month Warranty included** for worry-free operation.
- **10K Resolution** for highly detailed prints.

- **Print Speed of Up to 80mm/h** for fast and efficient results.
- **7-inch Monochrome LCD** for faster curing and longer lifespan.
- **Large Build Volume (153.4mm x 87mm x 165mm)** for bigger and more complex projects.

Anycubic Photon Mono 4 LCD Resin 3D Printer - Speed and Precision in One

Looking for a 3D printer that combines speed, precision, and ease of use? The **Anycubic Photon Mono 4 LCD Resin 3D Printer** brings all that and more to the table. With its impressive build quality and advanced monochrome LCD screen, this printer delivers high-resolution prints faster than ever. Whether you're working on detailed models, miniatures, or prototypes, the **Anycubic Photon Mono 4 LCD Resin 3D Printer** offers the speed and detail you need. Available now at *Master3D*, it's designed to bring your ideas to life with exceptional clarity and efficiency.

With a sleek 10K resolution, the **Anycubic Photon Mono 4 LCD Resin 3D Printer** ensures your prints come out with crisp, sharp details. The printer's ultra-fast print speed of up to 80mm/h allows for quick project turnaround, and the large build volume gives you the flexibility to create larger prints without limitations. This printer is perfect for anyone looking to step up their 3D printing game, whether you're a hobbyist or a professional.

Key Specifications:

- **Print Speed:** Fast printing at up to 80mm/h
- **Resolution:** 10K resolution for highly detailed prints
- **Display:** 7-inch monochrome LCD for longer lifespan and faster curing
- **Build Volume:** 153.4 x 87 x 165mm for larger print options
- **Connectivity:** USB, Wi-Fi for flexible connectivity

The **Anycubic Photon Mono 4 LCD Resin 3D Printer** is perfect for anyone who values both speed and detail in their 3D printing projects. Ready to take your creations to the next level? This printer will meet and exceed your expectations.

FAQs

1. Q. How fast does the Photon Mono 4 print?

A. It prints at a speed of up to 80mm/h, meaning faster results without compromising on quality.

2. **Q. What is the resolution of the Anycubic Photon Mono 4 LCD Resin 3D Printer?**

A. The printer boasts a 10K resolution, providing incredibly detailed prints.

3. **Q. Can I use my existing resin with the Photon Mono 4?**

A. Yes, the **Anycubic Photon Mono 4 LCD Resin 3D Printer** is compatible with most standard resins, allowing you to continue using your favourite materials.

Feature	Specification
Print Speed	Up to 80mm/h
Resolution	10K resolution
Display	7-inch monochrome LCD
Build Volume	153.4 x 87 x 165mm
Layer Thickness	0.01mm to 0.15mm
Connectivity	USB,
Supported Resins	Standard 3D printing resin, flexible resin, and other compatible resins
Operating System	Windows, macOS, Linux
UV Light Source	405nm UV LED
Power Supply	AC 100V-240V, 50/60Hz, 150W
Supported File Formats	.stl, .obj, .3mf, .fpp
Printer Dimensions	235 x 230 x 391mm
Printer Weight	4.5 kg (Approx.)

Disclaimer: Dimensions and weight may vary slightly due to manufacturing processes. The pictures shown are for reference purposes only and may differ from the actual product.

Warranty Exclusions

Please note the following exclusions where warranty coverage does **not** apply:

1. **LCD Print Screen**

The LCD screen is classified as a consumable component. It is **not covered under warranty** due to its wear-and-tear nature and potential damage from misuse or improper handling.

2. **Resin Spills**

Damage caused by resin spills is not covered under warranty.

Customers are responsible for operating resin printers carefully. While some features

are automated, resin printers still require **active human monitoring** during use to avoid preventable issues.
