- **Automatic filament switching** ensures non-stop printing when a spool runs out

- **RFID smart detection** for instant material setup with Bambu Lab filaments
- **Compact, lightweight design** with transparent casing for easy spool monitoring

Bambu Lab AMS Lite Automatic Material System for A1 Series - Unlock Color Without the Drama

This nifty gadget is the secret sauce your A1 printer's been craving. Ever wished your prints could swap colours mid-job? Meet your new best friend: the **Bambu Lab AMS Lite Automatic Material System for A1 Series** smart, slick, and built to make your 3D printing life way easier.

Why You'll Love the AMS Lite

At *Master3D*, we adore how the AMS Lite feels like a mini-assistant for your prints. It's not just a filament feeder—it's a color-changing, uninterrupted-printing wizard. The spring-loaded spools, translucent shell, and RFID brain behind the scenes turn the whole process from a hassle into a "wow, that was effortless" moment. Plus, it plays nice with snap-away supports and dissolvable materials—less cleanup, more fun.

Upgrade Your Workflow (and Your Prints)

Just imagine—you set up, hit print, and the **Bambu Lab AMS Lite Automatic Material System for A1 Series** handles the rest. No more babysitting. With four slots, it juggles multiple colors or materials like it's nothing. If you're mid-print and a reel runs dry, it swaps without skipping a beat. Cleanup's a breeze thanks to the see-through casing, and that RFID tech? It auto-sets the best parameters when you use Bambu Lab filaments.

Key Specs You Can't Ignore

- Supports up to **4 filament spools** (multi-colour/material magic)
- **Automatic filament backup & spool switching** for non-stop prints
- **RFID synchronisation** with Bambu Studio for seamless material detection
- **Improved spool compatibility** via spring-loaded rotary holders—even paper spools

behave

- **Dimensions & weight:** approx 397 x 208 x 342 mm, 1.6 kg—compact and light

Dropping the Tech Jargon, Keeping the Cool

Think of the AMS Lite as your printer's roommate who keeps the fridge stocked and knows just when to swap the reels—without pissing you off. It's that reliable, transparent (literally) buddy that quietly sorts out multicolor chaos while you sip your coffee.

FAQs (Because You've Got Questions, and We've Got Answers)

- 1. Q. Can I hook up more than one AMS Lite to my A1?**

A. Nope, the A1 series supports only one AMS Lite for up to 4-color printing. [Bambu Lab Community Forum](#)[wiki.bambulab.com](#)
- 2. Q. Will it work with X1 or P1 printers?**

A. Sorry, no—it's designed exclusively for A1 series units, not X1 or P1. [Bambu Lab Store](#)[3DJake International](#)
- 3. Q. Is it picky about filament brands?**

A. It's happiest with Bambu Lab filaments (thanks to RFID syncing), but you can use others—just set them up manually in Bambu Studio.

Specification	Details
Model Compatibility	Exclusively for Bambu Lab A1 Series
Material Capacity	Up to 4 filament spools
Filament Diameter	1.75 mm
Filament Types Supported	PLA, PETG, ABS, TPU, and other compatible materials
